Vehicle Counts Vs. Speed [Jan 25: Incoming]

SAM2 has now been positioned on White Hart Street and will be in place for two weeks with the message and speed display disabled. The intention is to collect data to compare with that collected when the SAM2 was first installed.

For the first 2 weeks at this location the display was deactivated. SAM2 continued to collect data during this period. The display was then active for the remainder of February. I then compared the data recorded for each period. I found that there was no significant difference in the number of speeding vehicles, the maximum speed recorded, or the average speed recorded in each period. Clearly, we don't know what happens when SAM 2 is not in position, but we might conclude that, during February, the equipment being in position was enough to control vehicle speeds along White Hart Street.

Sam2 is now active at Tallon End. It will be in this placement from 28/2/2025 to 31/03/2025 and then moved to School Road. The display will be deactivated for the first 2 weeks.
